Introduction to Azure virtual machines

1 hr 7 min • Module • 8 Units

★★★★★ 4.7 (9,441) | Rate it |

Beginner   Administrator   Developer   Solutions Architect   Student   Azure
Virtual Machines

Learn about the decisions you make before creating a virtual machine, the options to create and manage the VM, and the extensions and services you use to manage your VM.

In this module, you will:

- Compile a checklist for creating a virtual machine
- Describe the options to create and manage virtual machines
- Describe the additional services available to administer virtual machines
