Beginner   Developer   Azure   Logic Apps

Call any Web API from a Logic App using the custom connector.

In this module, you will:

- Create a custom Logic Apps connector
- Define the behavior of the connector using an OpenAPI definition
- Use the connector from a Logic App

Start >   🔖 Bookmark   ⊕ Add to collection

Prerequisites

- Basic familiarity with the authoring and running of Logic Apps
- Basic understanding of APIs and REST

This module is part of these learning paths
Build automated workflows to integrate data and apps with Azure Logic Apps

Introduction
2 min

Connectors for Azure Logic Apps
5 min

Exercise - Set up a test API
10 min

Access an API with a Logic App custom connector
5 min

Exercise - Create and call a custom connector from a Logic Apps workflow
10 min

Share a custom connector
